# Picture Perfect Music

# Unique Lifestyle

### The Art to Listen

No matter if your home is considered as a meeting place for family and friends, a cocoon to sit back, relax and enjoy or an expression of one's own personality: myaudioart is styled to give exquisite HiFi a unique setting. It combines great music experience with unique design, making room for individual taste in interior design.

No matter if your working area is aimed to meet your business partners, your clients or your patients: myaudioart combines exquisite ambience with elegant musical background and creates a pleasant atmosphere at any time, in every instant.

myaudioart Flat Hifi Systems blend perfectly into any interior design scheme - as a picture to hang on the wall.

No matter how you define “home” or “working area”, at AudioArt we see both as a place we can fill with audible and visible individuality. Where we can show off some engineering muscle and reveal our audio experience. Where we can fine tune the determination of a room for the people who live or work in it. Relaxed. Inspired. Creative. Open-minded. Focused. Entirely individual.

## Innovations For Individualists

## Technology At Its Best

Every myaudioart is an innovative lifestyle-product, combining the expertise of two corporations.

Audiotec Fischer's decades of audio experience and smart engineering make myaudioart a sonorous concert master. Founded in 1990 Audiotec Fischer became a world leading provider for reference class audio products. The company designs and manufactures at its head quarter in Schmallenberg. Both premises, "handmade" and "Made in Germany", are essential principles at Audiotec Fischer. Preferably regional suppliers allow for short delivery distances, direct communication and optimum procedures ensure best results. An exemplary diligent quality control underscores the philosophy of the company.

myaudioart's unique, elegant frames are also manufactured in Germany. Responsible for their continuously high quality is HJE - a renowned specialist for professional framework- and textile covering-solutions for advertising applications and private demands. HJE also sets highest priority on the "Made in Germany"-label and favors regional suppliers in order to guarantee best possible quality of every single product.

Now you are on demand to turn audio art into myaudioart! Your personal taste in design and music turn our Flat HiFi Systems into your individually designed audiophile artwork.

### Made in Germany

myaudioart is styled to give exquisite HiFi a unique setting. These ultra-slim, yet extremely powerful Flat HiFi Systems combine great music experience with unique design.

You choose your favorite music program - myaudioart provides appropriate connectivity to your preferred playback device: Bluetooth® V 3.0 + EDR featuring aptX® Codec support and 3.5 mm jack input provide connectivity to Smartphone, MP3-Player, CD-Player, Tablet, Tuner & Co. aptX® Audio Codec Bluetooth® ensures audio streaming in CD-quality. The input sensitivity of the jack input can be changed between max. 0,2 V and 2 V. Thanks to its Synchronice®-receiver the top-model **MA5** is ready for Apple Airport Express.

The **MA5** comes with a remote control for volume regulation, switching the Ambient Light on or off, for choosing the tone control and music source.

Convincingly Impressive

A vast range of individual designs is available in an extensive database, personal design faves can also be realized as long as the print resolution is suitable.

The new definition of sound aesthetics

To ensure long-lasting acoustical and visual pleasure, every myaudioart digital print features Deko-Tex premium fabric which is extremely durable in every environment. Its exceptional material quality ensures brilliant color depth and best possible sound permeability.

One highlight is the LED background illumination Ambient Light that features your myaudioart MA 5 with great light effects and creates a feel-good atmosphere.

With myaudioart, the subject music finally gets its personal touch!

After printing the fabric edge receives its stitched-on rubber lip the so-called "keder". This smart solution allows quick and easy motif change. Every print is extremely color stable and turns impeccably smooth once it is clamped into the frame.
